

SUFIYAN KHAN

Founding Engineer · AI Engineer · Full-Stack AI

suzkhan135@gmail.com • github.com/SufyTech • sufiyan-khan-ai.vercel.app • Satara, India • Remote • Immediate Joiner

PROFILE

AI engineer who builds and ships complete, end-to-end AI systems from scratch. Built Groundwork, an enterprise RAG system with hybrid retrieval and citation-grounded generation, and AI CodeReview Pro, a multi-agent PR review platform, both independently. Strong across LLM APIs, RAG, FastAPI backends, and React frontends. Seeking a remote Founding Engineer or AI Engineer role.

EXPERIENCE

AI Engineer - Independent

May 2026 - Present

- Architected Groundwork, an enterprise RAG system with hybrid BM25 + vector search (Reciprocal Rank Fusion), Cohere cross-encoder reranking, and citation-grounded generation - 1.00 Ragas faithfulness score.
- Implemented parent-child hierarchical chunking for context-preserving retrieval, and migrated vector storage from local ChromaDB to Qdrant Cloud after diagnosing a data-persistence issue on free-tier hosting.
- Built and deployed AI CodeReview Pro, a multi-agent PR review system orchestrated with LangGraph - triages pull requests, retrieves review context via Qdrant-backed RAG, flags high-risk changes for mandatory human escalation, and writes review comments end-to-end with a live observability dashboard.
- Owned the full stack across all projects: architecture, FastAPI backends, React/Next.js frontends, cloud vector storage (Qdrant), authentication (Supabase), and deployment (Render, Vercel).

Python · FastAPI · React · TypeScript · Next.js · Groq · LangGraph · LangChain · Qdrant · Cohere · Supabase · Docker

LLM Post-Training Engineer - Ethara AI

Mar 2026 - May 2026

- Performed RLHF data collection at scale - evaluated and ranked 50+ model responses daily and identified failure modes in multilingual and technical domains that fed directly into production model updates.

RLHF · LLM Evaluation · Prompt Engineering · Alignment Research

Software Engineer Intern - OctaNet Services

Aug 2024 - Oct 2024

- Built automated testing pipelines in Python and PowerShell that cut bug detection time for production web apps; designed dashboards to visualize results.

Python · PowerShell · JavaScript

KEY PROJECTS

Groundwork - Enterprise RAG System - [groundwork-rag-one.vercel.app](#)

- Hybrid retrieval (vector + BM25, Reciprocal Rank Fusion) with Cohere cross-encoder reranking and citation-grounded generation - every answer cites its exact source; scored 1.00 faithfulness and 0.71 answer relevancy on Ragas, with full Langfuse observability.
- Parent-child hierarchical chunking preserves document context across retrieval; migrated from local ChromaDB to Qdrant Cloud to fix a free-tier deployment issue.

FastAPI · Qdrant · Cohere Rerank v3.5 · Groq (Llama 3.3 70B) · Next.js · TypeScript

AI CodeReview Pro - Multi-Agent PR Review System - [ai-codereview-pro.vercel.app](#)

- Multi-agent LangGraph pipeline that triages pull requests, generates RAG-grounded review comments from a Qdrant-indexed knowledge base (style guide + security checklist), and escalates high-risk changes (auth/payments/migrations) to human review.
- Built a real-time observability dashboard (Recharts + FastAPI stats endpoint) tracking agent execution, escalation rate, and review breakdown by risk level, gated behind Supabase auth (Google/GitHub/email).

LangGraph · Groq · Qdrant · FastAPI · React · TypeScript · Supabase Auth · Recharts

TECHNICAL SKILLS

LLM & Agents: Anthropic Claude · OpenAI · Groq · Gemini · Cohere · LangGraph · AutoGen · LangChain · CrewAI · RAG · RLHF · MCP (Model Context Protocol)

Backend: Python · FastAPI · Node.js · Express.js · REST APIs · WebSockets

Frontend: React.js · TypeScript · Next.js · Tailwind CSS

Databases: PostgreSQL · MongoDB · Qdrant · ChromaDB · FAISS · Vector Databases

DevOps/Cloud: Docker · AWS · Vercel · Render · GitHub Actions · CI/CD · Linux

EDUCATION

B.Tech - Computer Science & Engineering -

Aug 2021 - Jun 2025

Yashoda Technical Campus, Satara (affiliated to DBATU University)
