

SUFIYAN KHAN

Founding Engineer · AI Engineer · Full Stack AI

suzkhan135@gmail.com · github.com/SufyTech · Sufiyan-ai.vercel.app · India · Remote · Immediate Joiner

PROFILE

AI engineer who ships production systems, not prototypes. Built and deployed a fully autonomous multi-agent AI support platform with LangGraph orchestration, RAG, and a live observability dashboard — plus a real-time voice AI agent — independently, from zero, while gaining direct exposure to frontier LLM post-training pipelines. Strong across the full stack: LLM APIs, RAG, voice pipelines, FastAPI backends, and React frontends. Looking for a Founding Engineer or AI Engineer role at a fast-moving startup where I can own and build.

EXPERIENCE

AI Engineer — Independent

May 2026 – Present

- Built AI Voice Agent end-to-end: Deepgram STT → Groq LLM → ElevenLabs TTS → FastAPI → React. Full mic-to-voice pipeline with <300ms latency, waveform UI, and live demo-ready deployment on Vercel.
- Deployed AI Support Pro — autonomous multi-agent customer support system orchestrated with LangGraph + Groq. Explicit graph-based routing handles triage, escalation detection, KB search, and resolution with two distinct execution paths (standard vs. urgent/fraud). Live in production.
- Built a real-time observability dashboard embedded in the product, tracking agent execution frequency, escalation rate, and ticket volume live.
- Owned the entire stack: system architecture, LangGraph agent design, FastAPI backend, React/TypeScript frontend, CI/CD via GitHub — sub-200ms response times under real load.
- Built production RAG pipeline (ChromaDB + sentence-transformers embeddings) with cited-source KB search, ticket classification, and priority routing.
- Integrated and benchmarked Anthropic Claude, OpenAI, Groq, and Gemini APIs — selected models and tuned prompts for cost-efficient production inference.

Deepgram · ElevenLabs · Groq · LangGraph · LangChain · FastAPI · Python · React · TypeScript · ChromaDB · Recharts · Docker · Vercel · Render

LLM Post-Training Engineer

Mar 2026 – May 2026

- Performed RLHF data collection at scale — evaluated and ranked 50+ model responses daily across diverse instruction types to improve alignment, safety, and instruction-following.
- Identified failure modes and edge cases in multilingual and technical domains; findings fed directly into production model update cycles.
- Built rare, first-hand understanding of the full LLM post-training loop — where models fail, why, and how to engineer around those failures when building inference products.

RLHF · LLM Evaluation · Prompt Engineering · Alignment Research · Red-Teaming

Software Engineer Intern

Aug 2024 – Oct 2024

- Built automated testing pipelines in Python and PowerShell that cut bug detection time significantly for production web applications.
- Designed dashboards to visualise test results; collaborated with senior engineers on manual testing and bug tracking workflows.

Python · PowerShell · HTML · CSS · JavaScript

KEY PROJECTS

AI Voice Agent — ai-voice-agent-roan.vercel.app

- End-to-end voice AI: speech captured via mic → Deepgram STT → Groq LLM → ElevenLabs TTS → spoken response. Full pipeline under 300ms.
- React frontend with live waveform visualisation, conversation history, and one-click demo mode. Deployed on Vercel.
- Demonstrates real-time AI system design — the exact capability most AI startups are hiring for right now.

Deepgram · Groq · ElevenLabs · FastAPI · Python · React · TypeScript · WebSockets · Vercel

AI Support Pro — ai-support-pro-theta.vercel.app

- Multi-agent support system orchestrated with LangGraph: agents triage, check for escalation, search a RAG knowledge base, and generate responses across two explicit graph paths — built for real load, not demos.
- Production RAG pipeline (ChromaDB) with cited KB search, priority classification, and a live observability dashboard for agent and ticket metrics.

LangGraph · Groq · FastAPI · React · TypeScript · ChromaDB · Recharts · Vercel · Render

TECHNICAL SKILLS

Voice AI: Deepgram (STT) · ElevenLabs (TTS) · Real-Time Audio Pipelines · WebSockets

LLM & Agents: Anthropic Claude · OpenAI · Groq · Gemini · LangGraph · LangChain · RAG · RLHF

Backend: Python · FastAPI · Node.js · Express.js · REST APIs · WebSockets · Webhooks

Frontend: React.js · TypeScript · Next.js · Tailwind CSS · Framer Motion · Recharts

Databases: ChromaDB · Vector Databases · MongoDB · DynamoDB

DevOps/Cloud: Docker · AWS · Vercel · Render · Railway · GitHub Actions · CI/CD · Linux

EDUCATION

B.Tech — Computer Science & Engineering

Aug 2021 – Jun 2025
